

Studentjob in *Drosophila* neuroscience lab at DANDRITE

We are looking for a motivated, flexible, efficient and practical student help (10-15hrs per week) in the lab for Circuit Neuroscience and Behavioural Genetics at DANDRITE, Aarhus University.

Your duties will be maintenance of *Drosophila* stocks, preparation of fly food, general maintenance work in the lab (e.g. autoclave duties, cleaning, organizing supplies) and assistance with experiments.

We are a small international lab with a friendly atmosphere. The working language is English. Previous experience in a biological laboratory, a background in Science and Technology and general interest in neuroscience are of advantage.

Science Technology students who are interested in the potential extension of the student job to a research internship are very welcome to apply.

Applications (in English) with CV and a short motivation letter to:

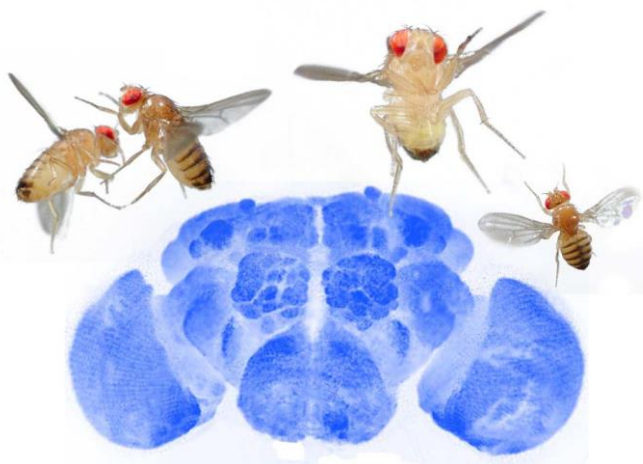

Anne Philipsborn, avp@mb.au.dk

Feel free to contact me if you have any question! Deadline for applications: April 18th 2015. Interviews will take place in week 17 and 18, preferred starting date May 1st 2015.
