

Dear all,

We wish to invite you to the second **ENABLE conference** that will take place in **Copenhagen from the 7th to the 9th November 2018**. ENABLE is a European symposium organized by, and for, PhD students and Postdocs. This initiative seeks to promote excellence in the biomedical sciences in Europe by supporting young researchers, strengthening scientific careers, and bringing biomedicine closer to society. To achieve this, ENABLE is organized in three main pillars:

- **Scientific symposium:** Two full days on which young scientists from all over Europe will learn about different biomedical fields and cutting edge techniques through talks, and informal chats with renowned scientists.
- **Career day:** A full day on which participants will be able to attend different workshops, chats with professionals, and learn about career opportunities at the “opportunity fair”, in which companies from the publishing world to the biotechnological and pharmaceutical sectors will be present.
- **Outreach activities:** To allow participants to explain biomedicine among citizens and bring science closer to society.

The ENABLE conference is about **opening academia from within** to promote a new research culture through a real exchange between young scientists, renowned researchers, industry professionals and citizens. Moreover, unlike other conferences, PhD students and postdoctoral fellows are in charge of the event as a way of **empowering** them in choosing their future.

This initiative has been cofunded by the European Commission led by four research institutes ([IRB Barcelona](#), [RIMLS](#), [NNF CPR](#), [SEMM](#)) and a science communication agency ([Scienseed](#)).

[Registration](#) is now open. Early bird discounts are available until July 31. A considerable number of travel grants are available for eligible participants who actively participate via poster presentation, short talk or micro talk. The deadline to apply for travel grants is June 30.

For more information, you can watch the ENABLE 2017 event video (through the QR code that you can find attached), visit our [website](#) or follow us on [Facebook](#) and [Twitter](#).

Let's spread the word to ENABLE the change!

On behalf of the Scientific Organizing Committee and Local Organizing Committee 2018,

Camilla Galli
