

NCA BrainTrain: New treatment modalities in Parkinson's disease

TIME: Thursday 29th September 2022 15:00-17:00

VENUE: Aarhus University Hospital, Entrance J, meeting room J115-139

BrainTrain is a new series of seminars organized by NeuroCampus Aarhus dedicated to empower scientific excellence, collaboration, and interaction across the neuroscience disciplines at AU and AUH. Our first seminar will focus on new technologies for imaging and clinical aspects of PD treatment and diagnosis and will include the following speakers:

- **Mark Denham** (Dandrite) - "Human lineage-restricted stem cells"
- **Nicola Pavese** (PET Center) - "Imaging subclinical pathology in prodromal Parkinson's"
- **Jens Christian H Sørensen** (Dept of Neurosurgery) - "Neuromodulation and Parkinson's Disease – new clinical aspects"

Coffee & cake will be served after the talks
All are welcome and no registration is needed.
