# YoDa Workshop:
An efficient note-taking workflow for reading scientific articles

Obsidian Zotero

- **Extract** notes from articles you read for fast and efficient access later

- **Integrate** references and notes using the software Zotero for reference management and Obsidian for note-taking

- **Connect** your notes to their source using citekeys providing instantaneous access with mouse cursor to preview your colour-specific annotations, images, article PDFs, and article-specific notes

- Bring laptop and download Zotero and Obsidian in advance

- You will be guided through downloading plugins and scripts – we'll take it slow and from scratch!

- When: Wednesday 22nd February at 13.00

- Where: Room 1872-547 at MBG

- With whom: Fellow YoDa member Seán Hansen, PhD student in Poul Nissen lab

2. Preview PDF

3. Link to open Zotero location

4. Open exact location in article where annotation or image was extracted from

1. In your notes, use citekey to preview reference note containing all your article notes just by hovering over link w. mouse cursor
