

Lecture by Lorena Benedetti

Title:

A novel structure of the endoplasmic reticulum enables long-distance Ca^{2+} signaling in neurons

Please join us for this exciting lecture by postdoctoral researcher Lorena Benedetti, Howard Hughes Medical Institute, Janelia Research Campus.

Lorena is a neuroscientist and cell biologist who is dedicated to unravel how organelles adapt their structure and function to sustain neuronal signaling and metabolism.

Wednesday, February 11th from 11:00 - 12:00

The event takes place at Jeppe Vontilius Auditoriet (1252-310), Søauditoriet / The Lakeside Lecture Theatre at Aarhus University

Ref. Benedetti (2025) Cell, 188(2):484-500.
