

Tour de lab – build.1182

Friday, 7 October 2022, 14:30-16:00

All DANDRITE's are invited to drop by building 1182, where representatives from the DANDRITE labs will be ready to give you a small tour of the labs. The event is like an “open house” and we will be serving a beer or soft drink in the hallway on the 2nd floor.

This is an opportunity to meet your colleagues, see our facilities and hear about the daily work here in building 1182.

1st floor	Capogna group presenting Meet the DANDRITE Support Team
2nd floor	Akihiro from Yonehara group will show the impressive 2 photon set-up and Bjarke will show their molecular lab.
2nd floor	Kvitsiani and Jensen groups presenting
3rd floor	Nabavi group presenting the JOINT and their rooms for behavior and recordings.
