

SEMINARS

Approaches to Personalised Medicine

Wednesday 20 April at 14.00-15.30

Eduard Biermann (1252-204), The Lakeside Theatres, Aarhus University, Bartholins Allé 3, 8000 Aarhus C

Lars Dyrskjøt Andersen, Department of Clinical Medicine

Tumor centric- and liquid biomarkers for guiding treatment decisions in bladder cancer:

Several prognostic and predictive biomarkers have been reported for guiding treatment decisions for cancer patients, however, few have demonstrated adequate power for clinical utility. I will give a talk about tumor- and liquid biopsy derived biomarkers, and potential future impact on cancer management and treatment.

Caroline Adolphsen, Department of Law

Research in data from biobanks and other registers – rules and consent:

The legislation concerning health data is quite complicated and might not always make sense in a practical reality. I will give an overview of the relevant legislation concerning research in health data collected and stored for different purposes.

Sign up here: <https://events.au.dk/personalisedmedicineseminar4>

Coffee and cake will be served after the seminar

Upcoming seminar – save the date!

Thursday 16 June 2022 at 14.00-15.30

Torben Heick Jensen, Department of Molecular Biology and Genetics
Jacob Giehm Mikkelsen, Department of Biomedicine
